Hp Deskjet F4280 Download Mac

I hooked up the printer (which is connected with a USB), installed the software, and everything seemed to be working fine.. HP Windows x86. But, when I print, nothing actually prints It just feeds the paper through Anyone have any idea why this is? Please help, I do online school, and I have to print around 30 things a day.. I have an HP Deskjet F4280 Printer and I just got a MacBook Pro (Its 2 years old).. Mac OS X Linux. VueScan HP Deskjet F4280 Windows x86, Windows x64, Windows RT, Windows 10 ARM, Mac OS X Linux.
